**Subject:** Microsoft Settlement

To whom it may concern,

This is my voice on the proposed Microsoft Settlement.

I feel that the proposed settlement will have little impact on Microsoft as a Monopoly or the way in which they conduct business. Microsoft has proven to me, from the beginning of this trail, that they care little for consumers best interest, but simply their best interest that all consumers run ONLY their software. They have also shown that they have never cared about the voice of the people who feel that they are not just in their actions, nor do they feel that our government will have any effect to them or their business practices. When I read the proposed settlement, I find that latter could very well be true.

I am not going to begin to bring out specific points in the settlement that I feel need altered, removed, or any that need added simply due to the fact that there are documents that have already adequately described my feelings. These documents I am in the process of co-signing and they will be delivered to you as well.

I am one voice. A single voice that cries out that justice be served. A single voice that hopes that it can help make a difference. A voice that does not have great material assets to directly challenge the powers that I disagree with. But I am a voice that cries out what I believe, and when joined with the voices of others that feel as I do, I am a voice that hopes that together we are heard. Most important, I am a voice that cries out because our country is founded on the belief that everyone has a right to express their concern on issues, and that their concern can be heard, and considered when decisions are made that will ultimately effect our lives, and the lives of every citizen.

Thank You,

Brad Myers
